Lady Slipper

RETAIL CATALOG

FERNDALE NURSERY

ASKOV, MINNESOTA

GREETINGS

To you, our many customers and friends. Some of you have been buying from us for many years, which means that our plants must be satisfactory. We endeavor to ship out only good stock and if we are out of the best we will not ship you the next best unless we write for your approval. In the busy season we probably will not get to write to you about such matters and will refund your money on stock not available or up to standard. standard.

We thank you all for your patronage in the years gone by and are ready to serve you again to the best of our ability.

The help situation has been downright bad for several years and now it looks better for spring. Our supply of many plants we used to offer has suffered and many varieties are completely out. We just have not got them. We have done very little seeding and transplanting of Evergreens for four or five years and consequently have little to offer. The Wild Flowers and Hardy Ferns are still the best in supply. Nature did not go to war, she kept right on with her business of growing these plants and we were able to get some help so we could get them dug and stored in the basement so we can offer you a good supply of such plants. Hardy Perennials are also in fair supply, not so many varieties and large numbers but what we have is first class.

We are listing some varieties of evergreen and other plants

We are listing some varieties of evergreen and other plants in our retail catalog which we will not list at wholesale because our supply is too limited for wholesale. We may have other plants which we used to have which are not listed and if you want any plants not listed we invite you to write us and tell what you want and if we have it or can get we will give you a price etc. price, etc.

want and if we have it of can get we will give you a price, etc.

We thank you all for business in the past and hope that we can count you in again this year. We promise you we will do our best to build up our stock this coming year so we can give you a more complete list to choose from. Perennials do not take so long to propagate, two years from seed and divisions on most varieties. Evergreens take a long time, two years from seed before they are ready to transplant the first time and then another two or three years before the second transplanting and then another three years and more before they are finally ready for Balled & Burlapped stage and then some of them will be very small, from twelve to eighteen inches for most varieties, making a total of nearly ten years before we can list them as B & B.

The Hardy Ferns and Wild Flowers we get 'Ready Made' but at that there is a lot of work to find a suitable place to dig them, and get a permit from the land owner or State if tax delinquent and then drive up to 65 miles back and forth each day when digging and perhaps get caught in a rain storm, or have flat tire or motor trouble on the way. Some of the Ferns and wild flowers we have to carry on our back over half a mile through a swamp to where we can get at them with the truck and must wear rubber boots. It is interesting work to locate these wild plants, some grow on sandy soil, others on gravel, some in swamps, hillsides, along rivers and streams, heavy woods and other kinds of soil and conditions. We must get the description of the land checking with neighbors, if any, within reasonable distance and then find out who owns the land from the County tion of the land checking with neighbors, if any, within reasonable distance and then find out who owns the land from the County Auditor and then write back and forth to come to an agreement on price and then when time comes to dig we get our spades, knives and axes ready, sacks to carry them in, rubber boots, raincoats, dinner buckets, drinking water, compass and what not, and off we go.

PRICES We believe you will find our prices in line with other nurseries offering similar plants. There will be many shortages again this year. We have not raised our prices from 1945 and in some cases we have lowered the price.

GUARANTEE

We guarantee all stock furnished by us to be first class, free from injurious insects and diseases and true to name. We do not guarantee plants to grow after planting. There are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered to transportation. tation companies.

8

RISK

All stock will be delivered to carrier lines in good condition and our responsibility ceases upon receipt of bill of lading. Claims for damage, loss or delay in transit should be filed with carrier.

SHIPPING INSTRUCTIONS

Customers should give explicit shipping instructions when placing order. We do not prepay transportation unless so mentioned. If wanted by parcel post or prepaid express a sufficient amount should be included with remittance for this purpose. It is not easy to estimate what such charges will be. We assure you we will return any difference to you or if you wish we will include extra plants to make up any over payment you may make.

BOXING AND PACKING

Perennials, hardy ferns and wild flowers are priced to include packing costs. Evergreens and shrubs take heavier packing material and we must charge for this service. Our charges are for actual material and labor involved, usually about 15 percent for B & B evergreens and 10 percent for bare root evergreens and shrubs. Any over remittance will be returned to you.

NOTICE

On account of extra work handling small orders we must ask that your order be for at least One Dollar.

Unfolding of the Osmundas

HARDY FERNS

As the hardy ferns were the beginning of Ferndale Nursery many years ago we start our catalog with them. They are trustworthy and lend themselves to varying conditions of the garden. They are especially well adapted to planting on the north side of buildings where most other plants will not grow, as foundation planting or for your wild garden. They do well with wild flowers in the wild garden, taking over after the early wild flowers have done their duty and die down for the season.

Hardy ferns do well in most any good garden soil but in their natural habitat they grow in leaf mold or in swamps, in peat, and if this can be provided they are sure to do well. Clippings from your lawn will be welcome in the ground and in winter give them some protection, loose hay or branches to hold the snow.

Ferns can stand a lot of abuse and after the first season they will go right on doing their duty without any extra care. The first season it is well to see that they have sufficient moisture so they can get a good foothold in the soil, they can hold their own against weeds if need be.

Ferns should be planted when dormant. We dig these ferns in the fall and store them in a cool cellar. Freezing will not harm them when dormant. If they are frozen upon arrival we suggest that you spread them out on a cool basement floor and water them. If they look dry do not become alarmed, but soak them well before and after planting.

Following is an index showing their adaptability to varieus conditions:

Parintiple of the planted of the reckery. So for shade:

Following is an index showing their adaptability to various conditions; R— indicates adapted for rockery; S—for shade; B—for the border; M—moist soil; O—open sun. Those best adapted for foundation planting are so indicated.

American Maidenhair (Adiantum pedatum)—RS—Foundation.
The spreading roots lie close to the surface and must be covered with leaf mold or other organic matter. Plant in protected places from wind and sun. Water well the first season and cover in winter. They thrive best on rocky, shaded hillsides or rich woodland. 25c each; 3 for 60c; 10 for \$2.00.

for \$2.00.

Beech Fern (Phegopteris hexagonopetra) —SM

A dwarf fern of spreading habit. From 6 to 8 inches high.
Rich soil well protected. Each 35c; 3 for 75c.

Blunt Lobed Woodsia (Woodsia obtusa) —R.

Will grow on bare rocky ledges a dwarf spreading fern,
water well. Each 35c; 3 for 75c.

Christmas Fern (Polystichium acrosticoides) —RS.

Fronds grow from 12 to 24 inches. Evergreen foliage. Not
particular as to soil, but prefers shade. Each 25c; 3 for 60c.

Cinnamon Fern (Osmunda cinnamomea) —M

Cinnamon Fern (Osmunda cinnamomea) —M

A large fern growing to a height of 3-5 feet. Fronds droop and will cover several square feet of space. Grows in wet soil, but also does well in common garden culture in semishade. Each 25c; 3 for 60c; 10 for \$2.00. Weighs about

shade. Each 25c; 3 for 60c; 10 for \$2.00. Weighs about 1-1½ pounds packed.

Clinton's Wood Fern (Dryopteris clintoniana) —MS.

Grows to 2 feet high, prefers rich moist soil. Evergreen foliage. Each 25c; 3 for 60c; 10 for \$2.00.

Crested Wood Fern (Dryopteris cristata) —MBS.

Grows best in moist shady places. Easy to grow. Do not plant too deep. Evergreen foliage. Each 25c; 3 for 60c; 10 for \$2.00 for \$2.00.

FOUNDATION PLANTING HARDY FERNS

Hayscented Fern (Dennstedtia punctilobula) —RBS—Foundation.
Grows to 2 feet high of spreading habit. Plant in rich porous soil in sun or shade. Excellent for border planting. Each 25c; 3 for 60c; 10 for \$2.00.

Interrupted Fern (Osmunda claytoniana) —ROS—Foundation. Interrupted Fern (Osmunda claytoniana) —ROS—Foundation.

Unlike the other Osmunda Ferns the interrupted fern prefers a moderately or even dry thicket clad hillside. Also thrives in ravines and rocky places. Does well in sun. Popular for foundation planting, grows to 4 feet high. Weighs 1-1½ pounds. Each 30c; 3 for 80c; 10 for \$2.25.

Lady Fern (Athyrium felix-femina) —ROS.

One of our best sellers as it does well in varying conditions in border or foundation planting on hillsides in sun or shade. 25c each; 3 for 60; 10 for \$2.00.

- Leathery Wood Fern (Dryopteris marginalis) —RS—Foundation.

 Does best in shade and appreciates moisture and protection from wind. Grows to 18 inches. Each 30c; 3 for 75c; 10 for \$2.00.
- Ostrich Fern (Pteris nodulosa) —ROS.

 This fern is called 'The Palm of the North'. Fronds are 6 to 10 inches wide and grow to a height of 3 or 4 feet and even higher. Thrives along streams in rich porous soil which is subjected to overflowing in spring. Will multiply by runners when planted in rich porous soil. Will grow in sun or shade and is our One Best Seller and gives universal satisfaction. Do not plant too deep. Plant crown half ways in soil and cover well with grass clippings as a mulch. Each 25c; 3 for 60c; 10 for \$2.00.
- Polypodium Common (Polypodium Vulgare)—RS.
 Fronds 4-6 inches long, growing in dense masses on rocks in shade or semi shade on steep hill sides. Keep them watered well until established. Sold in squares about 6 inches. Each 25c; 3 for 60c; 10 for \$1.75.
- Royal Fern (Osmunda regalis) -M Pale green fronds 2-3 feet high. Prefers moist shady location. Can be grown in shallow still water or boggy soil. Each 30c; 3 for 80c; 10 for \$2.25.
- Rusty Woodsia (Woodsia ilvensis) -R This odd and extremely attractive little fern grows in dense clumps on exposed summits and steep rocky cliffs in full sun. Keep well watered until established. Each 50c; 3 for \$1.25.
- Sensitive Fern (Onoclea sensibilis) —RMO—Foundation.

 Grows 6 to 30 inches in height. Prefers moist locations and will form a dense mat. Cover with ½ inch soil. Each 25c; 3 for 60c; 10 for \$1.75.
- Toothed Wood Fern (Dryopteris spinulosa) —MS. Fronds 1 to 3 feet remaining green all winter. Plant crown level with surface. Each 25c; 3 for 60c; 10 for \$1.75.
- Winged Wood Fern (Dryopteris hexagonoptera) A tiny fern which if given proper conditions will form a mat of growth in rich shady soil. 3-4 inches high. Each 25c; 3 for 60c; 10 for \$1.75.

FERN BED COLLECTION

A Fern Bed for \$5.00 Prepaid

These collections are selected to meet certain growing conditions as indicated. For customers who may be in doubt as to which varieties will meet their particular growing conditions, these collections will be helpful.

Either collection will be shipped Prepaid for \$5.00, or one half collection Prepaid for \$3.00. By Express not prepaid each collections \$4.00. One half collection for \$2.25.

- No. 1—This collection has been made up with a view in mind of offering a number of ferns which may be depended upon to succeed under ordinary garden conditions and with a minimum of care. 8 Ostrich Ferns, 8 Lady Ferns and 4 Interrupted Ferns.
 No. 1—A—Suitable for same general growing conditions as collection No. 1. 4 Clinton Wood Ferns, 6 Ostrich, 4 Interrupted and 6 Lady Ferns.
 No. 2—Selected for dry, shady locations. 6 Lady, 4 Hayscented, 4 leathery wood and 4 Interrupted Ferns.
 No. 3—For moist shady places. 6 Clinton Wood, 4 Ostrich, 4 Lady and 4 Maidenhair. Ferns.
 No. 4—For wet ground. 6 Sensitive, 2 Royal, 2 Cinnamon, 4 Clinton Wood, and 4 Hayscented Ferns.

PERENNIALS

Wild Flowers, Rock Garden Plants

When the early pioneers took possession of this vast wilderness known as North America, they found it replete with a luxuriant growth of native plants. Throughout the vast wooded section grew not only the stately pine and oak, but also the dainty little houstonia and hepatica, the trillium, bloodroot, gentian, violet and a myriad of others. In the cool moist bogs and marshes grew not only the towering cedar and tamarack, but also the cypripedium and pitcher plant, while over the boundless prairie were found almost innumerable sun-loving flowering plants and throughout grew ferns in endless variety.

But we have cut down the forest, drained the bogs, and the plow has turned the prairie sod under to make room for agriculture. And, as if to complete the destruction of wild life, fire has swept the whole section time and again. The native plants have been crowded farther and farther back into inaccessible nooks and wastelands where they are now making a last stand in face of destruction.

Many of these wild plants bear flowers of indescribable beauty and daintiness. Where do we find a more beautiful orchis than the showy lady-slipper or a more delicate orchis than the habenaria? No domesticated violet can compare with Pedata bicolor and rarely do we find a more curious and interesting plant than the pitcher plant with its wax-like flowers of beauty and interest.

To many of us the fascinating scene of nature's garden lingers in memory only. It belongs to days gone by when nature had not yet been violated by man's mad scramble to subdue and civilize.

But we can do much to restore this dwindling family of nature's creations to a place they richly deserve. Throughout the length and breadth of the land there is awakening a great interest in wild plants.

Throughout our Catalog we list a number of native plants. They have been brought together from distant localities. From Vermont to Carolina and the Rocky Mountains we have gathered them and they are offered to our customers in the hope that they may find permanent homes where they may receive care and appreciation.

Hardiness. There is no class of plants more hardy when once established under natural conditions of soil, moisture and exposure, and none so much admired as these rapidly vanishing natives of our woodlands, swamps and prairies. Join the ranks of the wild flower enthusiasts and get a real thrill watching these wildlings make themselves at home in your garden.

Realizing that it would be utterly impossible in the space available to give even the briefest cultural directions for each species listed, such information as we offer is intended as a guide to aid customers in selecting plans suitable for their particular planting problems by stating conditions, not too limited, under which such plants may be expected to thrive and do their best. The presence of such conditions does not necessarily guarantee success, but the lack of them will, in some instances at least, spell failure.

In selecting plants offered in this list, two objectives have been kept constantly in mind: (1) That the plants have merit and are worthy of a place in the garden. Plants of a decidedly weedy nature have been eliminated. (2) That they are strains of sufficient hardiness to withstand our severe winters under ordinary circumstances. While these plants are of great hardiness and may be expected to give satisfactory results in the North, they, in common with all northern-grown plants, possess greater vigor, well known to horticulturists, and will give highly satisfactory results when planted much farther South. Some of the plants which require little or no shade in the North would perhaps require some shade in the South.

To aid customers in selecting suitable plants the following index may be helpful:
*—Wild plants.

R—Suitable for rock-garden. S—Requires shade.

O—Plants requiring open, sunny location.
B—Border plants.
C—Suitable for cutting.

T-Trailing.

W—Of special merit for wall-garden.

M—For bog, marsh or wet situation.

Note: 10 plants at 3 times the rate per 3.

25 plants at rate per 10, less 10 per cent.

100 plants at rate per 10, less 20 per cent.

Achillea Ptarmica, The Pearl—BC—2 ft. Pure White flowers from June to August in great profusion on long stems. Each 30c; 3 for 75c.

*—M—2 ft. Broad grass like fronds. Flowers not showy, but green leaves add to the attractiveness of the wild garden. Thrives in wet soil or shallow water. Each 30c; 3 for 75c.

Actea alba White Baneberry.

*—RS—18 in. A hardy native with long spikes of clear white flowers, followed by glistening white berries. Wants rich moist soil in deep shade. Each 30c; 3 for 75c.

Actea rubra Red Baneberry. *—RS—Resembles the White Baneberry, flowers fluffy and berries rich crimson. Requires less shade than actea alba. Each 30c; 3 for 75c.

Anemone Windflower.

*—A hardy attractive lot of herds for the border or wild flower garden. Do best in rich sandy loam.

Anemone Canadensis

*—RO—1-1½ ft. A native for the open border. Large white flowers in May.

the open border. Large white flowers in May. Each 30c; 3 for 75c.

Anemone Patens Pasque Flower *-O-6-10 in. A beautiful dwarf plant with pale violet flowers in May. Prefers sunny location in moist sandy soil. Each 35c; 3 for 90c.

Anemone Pulsatilla alba.
European Pasque Flower.
—RO—Somewhat larger than
our native Anemone Patens with white flowers.

Anemone Pulsatilla Rubra

—RO—A deep red form of the above. Prefer moist sandy loam in open sun.

Two varieties above Each 35c; 3 for 90c.

Anemone sylvestris

—BS—An attractive plant for the shaded border or open in the wild flower garden. Pure white fragrant flowers. Moist sandy soil. Each 30c; 3 for 75c.

Aquilegia, Columbine

—Very hardy perennials.

Will do well in most any soil, prefer moist porous soil well drained in open sun protect from the wind. wind.

Aquilegia Crimson Star —BOC—One of the newer va-rieties of Columbine. Large crimson flowers with white corrola. Each 35c; 3 for 90c.

Aquilegia Chryantha

—A yellow flower very beautiful, spurs not as long as the regular long spurred. Each 30c, 3 for 75c.

Aquilegia

—Mrs. Elliots long spurred mixed. One of the Old Standbys with all colors from white through pink, blue and red. Each 30c; 3 for 75c.

Arctostaphylus uva ursi

Bearberry.

*—TR—An evergreen plant of trailing habit. Desirable trailing habit. Desirable for covering hillsides with poor sandy soil where other plants will not do so well. We offer plants from rooted cuttings which were potted last summer. With some protection and watering the first year they will take over and hold their own with a minimum of care. Each 35c; 3 for 90c.

Arisaema triphyllum
Jack in the Pulpit.
*—RS—Also called Indian Turnip. A very interesting hardy perennial for the wild garden, requires rich wood soil in moist shady location. Each 30c; 3 for 75c.

Artemesia Border Mist

Wormwood *—RBO—6-8 in. high Delicate silver foliage. Compact of growth and attractive as a foliage plant in the rock garden and hardy border. Each 25c; 3 for 60c. 60c.

Artemesia Frigida Mountain Sage

*—RO—Beautiful glistening silvery foliage growing to a height of 18 in. Easily grown in the garden, but does not tolerate winter moisture. May be cut and dried for winter bou-quets. Each 35c; 3 for 90c.

Artemesia Silver King

—RBCO—A very handsome white leaved plant of rare beauty for contrast in landscape effect or border. Can also be cut and dried for winter bouquets. Each 30c; 3 for 75c.

Asarum canadensis

Asarum canadensis
Wild Ginger
*—MS—A woodland perennial
herb with aromatic root
stalks and kidney shaped leaves. Chocolate colored flowers for carpeting moist shady woodlands. Requires soil rich in humus. Each 25c; 3 for 60c.

Aster alpina light blue

RO—10 in. in height. One of
the most desirable of the perennials, of easy culture and does well in the low border in open sun, valuable as edging plants. Each 30c; 3 for 75c.

*-OB-One of the best known
of the Hardy Asters
grows to 30 in. Beautiful purple flowers in Fall
of year. Divisions Each 35c; 3 for 90c.

Baptisia australis False indigo

BO—3 feet in height. A
strong growing plant
with dark green foliage.
Dark blue or purple in
color. Flowers and seed
pods resemble peas. Divisions of blooming size visions of blooming size. Each 30; 3 for 75c.

Calamnitha alpina

*—RO—6 in. A spreading
dwarf plant with small
purple flowers for the
border or rock garden.
Each 30c; 3 for 75c.

Caltha palustris

Marsh Marigold

*—M—A delightful bright yellow spring flower for bog or for stream. Easily transplanted into soil not too dry, at home in sun or shade. Each 30c; 3 for 75c.

Campanula trubinate

—RBO—Similar to above but more upright in growth flowers on stems 6-8 in. Beautiful blue flowers. Each 30c; 3 for 75c.

Campanula Persicifolia

Peachbells

—BO—White flowers in showy terminal clusters. Desirable for the open border. Each 30c; 3 for 75c.

Campanula rotundifolia

*-RO-Blue belles of Scotland. A persistant grower which may be found on porous sandy well drained soil. Will grow on acid or neutral soil. Clear blue flowers in June and July. Each 30c; 3 for 75c.

Chelone Turtlehead Glabra

*—M—Dragonhead. A beautiful white flower in late sum-mer prefers moist semi-shade. Each 30c; 3 for 75c.

Chelone Ilyoni

—Pink form of ab Each 30c; 3 for 75c. of above.

Chrysanthemum

Shasta Daisy Alaska Shasta Daisy Alaska

OBC—The Shasta Daisy is one of the best known of the Biennials and will yield an abundance of beautiful white Daisies which are beautiful as cut flowers. 1 year field grown plants which will bloom this summer. Each 25c; 3 for 60c.

Cimicifuga racemosa

*—RS—1-2 feet. Rich pink flowers 2 in. across. Silvery foliage. Each 30c; 3 for 75c.

Convallaria majalis

*—MRS—Lily of the valley. A well known low growing spreading plant with small fragrant white flowers. Prefers rich moist soil in shade. Heavy clumps. Each 30c; 3 for 75c.

Cypripedium Lady Slipper

*---Moccasin Flower. These
are our most beautiful
Wild Flowers. Charming Wild Flowers. Charming Native Orchids. Ground should be well prepared by adding of humus, such as granulated peat, grass clippings or muck. The roots require moist soil but they will not tolerate having their roots constantly under water. Plant them on the high spots in the Bog Garden so the roots can reach down to moisture. They also want shade.

Cypripedium Acaule

MS—Purple Moccasin. With large green leaves. This large green leaves. This is also called stemless moccasin as the leaves lay right on the ground, but flower is on a long slender stem. All Lady Slippers prefer Acid Soil. Sold by buds only. 5 buds \$1.25; 25 buds \$5.00.

Cypripedium Pubesence

*—MS—Yellow Lady Slipper.

Bright yellow flowers. The easiest of Lady Slippers to grow. It adapts itself well to the Wild Flower Garden with a minimum of moisture, and when well established will increase by layering Sold. crease by layering. Sold by buds only. 5 buds \$1.50; 25 buds \$6.00.

Cypripedium Spectabilis

—MS—Showy or Pink Lady
Slipper. This is the Minnesota State Flower and
is the most beautiful of is the most beautiful of the Lady Slippers. Strong growing light green fo-liage. Grows to 2 feet high. Beautiful showy flowers with white sepals and pink petals. Truly The Queen of the Wild Flowers. Buds. 5 for \$1.75

Delphinium Larkspur

BCO—Delphiniums are one of the most showy of the Hardy Perennials. As a rule they are very hardy with us, but this last winter (1943-44) got the best of them as had tnem planted on ground and low and the excessive moisture early in the spring took most of them. They require well drained and rich soil. Also need staking as they grow to quite a height up to 4-5 feet for the Pacific Giants and the wind blows them down.

Delphinium Pacific Hybrids
—BCO—The V & R Pacific
Giants are considered the Giants are considered the best in Delphiniums and make a splendid showing with their many colored semi to double flowers on long stems with an abundance of bloom. Good sized clumps that will bloom this summer. Mixed colors only. Each 50c; 3 for \$1.25.

Dianthus plumarius Garden Pink

BO—Various colors of white and pink and red mixed.

1 year plants which will bloom this summer. Each 20c; 3 for 50c.

Dicentra cucularia Dutchman Breeches

5-5-9 in. Very early spring blooming plant with fine lacy foliage and loose racems of in-*—RS—5-9 verted white flowers in April and May. Dies down after blooming like tulps. Bulbs, each 15c; 3 for 40c.

Dicentra exemia
Fringed Bleeding Heart.
*—RB—1½ ft. Foliage delicately cut. Blooms all summer. A native of the Big Smoky Mountains, but perfectly hardy here. Each 35c; 3 for 90c.

Fashioned Bleeding Heart

BO—Still a popular Perennial,

will thrive in open sun

or semi shade. Each

40c; 3 for \$1.00. Dielytra spectabilis

Dodecatheon media

Shooting Star

*—RS—A native plant with
large glossy basal leaves
and nodding cyclamen flowers ranging from white through purple and rose. At home in part shaded, damp woodland or shaded rockery. Each 30c; 3 for 75c.

Draba aizoon. Whitlow Grass
*—RO—4 in. Tufted hardy perennial herb with sulphur
yellow flowers in early
spring. Each 35c; 3 for 90c.

Erythronium americana

Dogtooth violet, Trout Lily. Dogtooth violet, Trout Lily.

*—RS—Early spring blooming herd of the lily family.

Has richly mottled foliage with dainty nodding yellow flowers. Plant dies down after blooming, but will come back the following spring. Plant in early spring or fall. Each 15c; 3 for 40c. *—TS—An attractive spring blooming native flower.
Trailing habit. Flowers very fragrant. Quite difficult to transplant. We ficult to transplant. We offer plants dug with ball of dirt. Require acid soil well drained. Each 50c; 3 for \$1.25.

Funkia caerulea. Plantain lily.
—SO—Perennial herb with thick
roots and heavy ribbed
foliage. Pale blue flowers. Will thrive in any
garden but prefers moist
shady situation. Each
30c; 3 for 75c.

Gualtheria procumbens
Aromatic Wintergreen.

*--RT-4-6 in. A beautiful
trailing evergreen shrub
with tiny white or pink
flowers followed by pea
sized red berries. Well
adapted for ground cover
among evergreen. Must
have well drained soil in
part shade. Each 30c;
3 for 75c.

Gaillardia Burgundy.

Blanket Flower

-BC-1-2 ft. A very fine perennial bearing a profusion of wine red flowers on strong stems. Drought resistant. Each 30c; 3 for 75c.

Gentian andrewsi.

Bottled or closed Gentian.

*—RM—2 ft. A beautiful

American native growing
along streams and in
moist woods in shade or
part shade. Requires
rich moist soil. Blooms
in August and September
with deep purple flowers
which never open completely. Each 35c; 3 for
90c.

Gentian macrophylla

*—RM—1 ft. Plant is more
squatty than Andrewise.
Thrives under same gen eral conditions, blooms earlier, about mid-sum-mer. Each 35c; 3 for 90c.

Geranium maculatum. Cranesbill or Wild Geranium
*—RO—1-1½ ft. Rose purple flowers. Very showy in summer. Thrives in moist semi open locations. Each 25c; 3 for 60c.

Geum Borisii

Omega Scarlet flowers, evergreen foliage. About 12 in. Will grow in any good garden soil in open sun or border. Each 30c; 3 for 75c.

Geum triflorum. Torch Flower

*—RS—A very attractive plant
in the wild, garden in
shade on well drained
soil. Flowers soft rose,
beautiful cut foliage.
Each 35c; 3 for 90c.

Gypsphilla panticulata

Baby Breath

CO—Has fine feathery panicules of tiny white flowers, highly prized for cutting. Plant in sunny well drained ground. A little lime added to soil will be appreciated. Each 25c; 3 for 60c.

Habanaria fimbriata

Showy orchid

—MS—1 to 3 ft. One of nature's most dainty and beautiful native orchid.
Requires rich deep soil of acid nature with abundance of moisture. Purple fringed flowers in spikes sometimes 12 inches long. Each 50c; 3 for \$1.25 \$1.25.

Hemorocallis.

morocallis. Day Lily.

—Very hardy and easily grown in the open sunny garden. With three or four varieties of Hemorocallis you can have blooms all summer.

Hemorocallis Apricot.

Name indicates
Blooms June-July.
35c; 3 for 90c. color.

Hemorocallis Dumorteri

Golden yellow.
—May-June flowers. 35c; 3 for 90c.

Hemorocallis Kwanso

—Large golden bronze
flowers in August and
September. Each 35c; 3 for 90c.

Hemorocallis Mikado
—One of the newer introductions. Rich yellow flowers in Midsummer. Each 50c; 3 for \$1.25.

Hemorocallis W. H. Wyman
—Pale glistening yellow
flowers in July and August. Each 50c; 3 for \$1.25.

Hepatica acutiloba Liverwort...
*—RS—A lovely early spring
flower. Low growing native with three lobed
leaves. Flowers in hues
of pink blue and white.
At home in rich shady
situations. Plant in
early spring or in fall.
Each 30c; 3 for 75c.

Hepatica triloba

*—RS—Nearly the same as acutiloba above in flowers and habit of growth. Main difference in shape of leaves. Each 30c; 3 for 75c.

Iris Cristata. Crested Iris.

ris Cristata. Crested Iris.

—RB—3 to 6 in. high. One of the smallest of the Iris.

A native from the Blue Ridge Mountains. Perfectly hardy here. Profusion of amethyst flowers in May. Each 30c; 3 for 75c.

Iris Versicolor. Blue Flag, Feleur-de-lis.

A splendid Iris for Mass planting in wet locations. Each 30c; 3 for 75c.

Lewesia Redidiva.

Montana Bitterroot.

*—RO—A stemless hardy plant
from the Montana Rockies. Succulent leaves about one inch long with large pink flowers, somewhat resembling a water lily. Requires poor gritty soil and perfect drainage. After blooming foliage disappears until Fall when new leaves develop. Each 35c; 3 for 90c.

Liatris Pychnosatchia.

Kansas Gay Feather.

*—BC—3 to 5 ft. A strong growing perennial with pink flowers on spikes, very showy in the wild flower garden. Also for cut flowers. Thrives on poor sandy soil in full sun. Each 20c; 3 for 50c.

50c.
Liatris scariosa Blazing Star
*—BC—Very similar to above
but does not grow so
tall. Flowers bluishpurple. Much used for
cut flowers. Thrives in
poor sandy soil in open
sun. Each 20c; 3 for 50c.

sun. Each 20c; 3 for 50c.

Lily canadensis

Wild Meadow Lily

*—B—2 to 4 ft. Drooping
bright yellow flowers.

Lilies want well drained
soil and protection from
wind by planting among
other plants or staking.

Each 30c; 3 for 75c.

Lily Concolor Star Lily

*—B—2-3 ft. Flowers erect
about 3 in. long, bright
red and unspotted. A
beautiful small lily. Each
30c; 3 for 75c.

30c; 3 for 75c.

Lily Elegans

-B-2 ft. One of the easiest lilies to grow and very showy. Orange-red spotted flowers. Each 30c; 3 for 75c.

Lily Superbum

*—B—Turks Cap Lily resembles Tiger Lily but of more robust growth, growing to height of 5 feet or more. Native in wet meadows, a beautiful vellow spotted flowful yellow spotted flower, well worth a place in the wild flower garden. Each 35c; 3 for 90c.

*—BO—2-3 ft. A small lily making a big showing in the open border, bright scarlet nodding flowers. Each 30c; 3 for 75c.

Lily Tigrinum Tiger Lily

OB—3 to 5 ft. Drooping
flowers about 4 in. wide,
orange or salmon-red
with black spots. Excellent for cutting. Either double or single flowers. Each 30c; 3 for 75c.

Lobelia Cardinals

Cardinal Flower.

—MB—A tall erect growing wild flower. A showy and beautiful native wild flower of intense crimson. At home in wet half shady locations. Each 35c; 3 for 90c.

Lobelia Syphillitica

Great Blue Lobelia

*—MB—24-30 in. More robust
growing than Cardinals.
Requires same soil, etc.
Each 35c; 3 for 90c.

Lychnis Arkwrighti Champion...
-R—A neat rock garden plant
with reddish purple flowers about 6 inches high.
Each 30c; 3 for 75c.

Lythrum Roseum salicaire
Loose strife.

—RB—A showy border plant or
for planting along a lily
pond or stream. Likes
moisture at the roots.
Beautiful pink flowers in
profusion in mid-summer. Each 30c; 3 for 75c.

Mertensia Virginica

Wertensia Virginica
Virginia Blue Bells.

*—BR—A very showy and effective plant for early spring bloom. Grows to height of 12-18 in. Flowers bluish tinted with pink, occasionally a pure white bloom. They make a grand showing in the moist woodlands. Plants a grand showing in the moist woodlands. Plants die down after blooming like tulips. Should be planted in Fall or early spring. Require good drainage. Each 25c; 3 for 60c. Jumbo size bulbs Each 35c; 3 for 90c. 90c.

Mitchella repens

Mitchella repens
Partridge Berry
*—RTS—A dainty trailing little
vine at home in the shaded rock or wall garden.
Creamy white flowers
followed by showy scarlet
berries. Want rich
woods soil not too acid.
Each 35c; 3 for 90c.

Monarda didyma Oswego Tea or Bee Balm.

-BO-An American genus of the Mint Family, growing 2 to 3 feet. Flowers beautiful scarlet. Lend themselves to mass planting along streams or against dark background in wild flower garden. Prefer moist sunny location. Each 30c; 3 for 90c.

Myosotis Palustris The True Forget-Me-Not

Porget-Me-Not

—RBM—A low growing spreading plant with a profusion of small blue flowers. Likes shade and rich moist shady location. Each 25c; 3 for 60c.

Orchis Spectabilis

Orchis Spectabilis

*—SM—A charming little Orchid with flowers of delicate lavender and very fragrant. Plant in deep shade in rich moist soil.

Not one of the easy Wild Flowers to grow, but if given right conditions will repay you many times over with beautiful fragrant flowers.

Each 40c; 3 for \$1.10. Each 40c; 3 for \$1.10.

Oreganum Vulgare
Wild Majoram.

*—R—A hardy perennial plant
with aromatic foliage
and purplish blue flowers borne in spike-like
clusters. The beautiful wooly foliage renders this an outstanding rock garden plant. Requires warm moist soil, in open sun. Each 30c; 3 for 75c.

Phlox Species—We offer a list of native Hardy Phlox which are perfectly hardy and make a good show-ing in the wild flower garden.

Phlox Amoeana
*—RT—1 ft. A spreading type
with clusters of purplish-red flowers in early
spring. Requires full
sun and well drained
soil. Each 30c; 3 for 75c.

Phlox Bifida Cleft Phlox
*—RT—1 ft. Low growing with
stiff stems. Star like
flowers of beautiful violet-purple. Full sun and well drained soil. Each 30c; 3 for 75c.

Phlox Divaicata canadensis Phlox Divaicata canadensis

*—RB—10 in. One of the most
widely used of the native phlox. Also called
Wild S w e e t William.
Plant in semi shade of
rock garden or border.
Large fragrant lavender
flowers in May and early
summer Want good summer. Want good drainage and good soil. Each 30c; 3 for 75c.

Phlox Ovata Carolina *—R—A hardy native from the
Big Smoky Mountains of
Carolina. Bright green foliage with clusters of beautiful purplish - pink flowers in May and June. Well drained soil. Each 30c; 3 for 75c.

Phlox Subulata Creeping Phlox Subulata Creeping Phlox
—Spring blooming plants
with moss like foliage
which is covered with
bloom in early summer.
In this section the creeping Phlox are at their
best for Memorial Day
and are highly prized for
grave covers. Require well drained sunny location.

Phlox Subulata Roseum. —Rose pink. An old standby but still one of the best. Each 25c; 3 for 60c.

Phlox Subulata Vivid

Bright pink, fiery red eye. Perhaps The Best of the Creeping Phlox. Each 35c; 3 for 90c.

Physostegia Virginica

False Dragonhead.

--MS-2-3 ft. Large clusters of delicate pink flowers on long spikes. July.

Each 25c; 3 for 60c.

Platycodon Mariese Balloon Flower

Balloon Flower

RBC—1-2 ft. A showy perennial for border or rockery. Large blue or white balloon like flowers. Excellent for cutting. Blue or white. Each 30c: 3

Polemonium Jacob's Ladder -RO-1-2 ft. A native hardy perennial of a spreading nature with delicate blue flowers. Thrives in full sun in any ordinary garden soil. Each 30c; 3 den soil. for 75c.

Polygonatum Biflorum

Solomon Seal.

*—RS—2-3 ft. A very attractive addition to the wild garden. Pendant sprays of fragrant white flow-ers in May. Thrives best ers in May. Thrives best in rich wood soil in shadlocation. Each 30c; 3 for 75c.

Pyrethrum Painted Daisy
—BCO—2 ft. Very hardy perennials with finely cut
foliage. The beautiful
daisy-like flowers are
fine for cutting. In shades of red, pink and white. Mixed only, Each 30c; 3 for 75c.

Pyrethrum uliginosum

-White flowers. Very hardy. Divisions Each 20c; 3 for 50c

Pyrola Americana

Pyrola Americana
Indian Lettuce.
*—SR—1 ft. A native here from
the light sandy country.
They want well drained
soil and semi shade.
Long leaf stalk with
thick, dark, glossy green
leaves and numerous
white, waxy sweet scented flowers. Will do best
if given rich sandy soil.
Each 30c; 3 for 75c. Each 30c; 3 for 75c.

Ranuncules acris Buttercup
—R—A double flowered upright growing Buttercup with attractive yellow flowers. Thrives well in any garden soil. Each 25c; 3 for 60c.

Ranuncules Repens

RT—Flowers same as above.

This plant is more of a weedy nature, but can be kept under control and makes a beautiful cover plant. Each 25c; 3 for 60c 60c.

Salvia pratensis Sage

-B-2 ft. Leaves oval, slightly wrinkled, flowers brightly colored. Prefer rich loamy soil in full sun. Pink, blue or white Each 30c; 3 for 75c.

Sarracenia purpurea
Pitcher Plant
*-M-12-18 in. A showy and
interesting Bog Plant.
Leaves resemble a pitcher. Flowers are nodding, range in color from yellow to purple. Requires rich boggy damp situation to succeed. Each 35c; 3 for 90c.

Sedum. Stonecrop

-RO-A vast assortment of hardy dwarf plants for the rock garden are available in Sedum and

Sempervivum. Plants Sempervivum. Plants have succulent leaves. Some die down after blooming, others are practically evergreen all winter also. They are easy to grow, requiring well drained soil and when once established need not be watered. Want full sun.

Sedum Acre Golden Moss

—Tufted plants evergreen
foliage, bright yellow
flowers, spreading. 5 in.
Fine for carpeting. Each
25c; 3 for 60c.

Sedum Aizoon

—Strong growing up to 12-18 in. Bushy, yellow flowers. Each 25c; 3 for 60c.

Album Sedum

Forming a dense mat of evergreen foliage which is covered with tiny white flowers. Spreading, low growing. Each 25c; 3 for 60c.

Sedum Sexangular

--Small dense mats of evergreen foliage, yellow flowers. Each 20c; 3 for 50c.

Ibericum

—Toothed leaves with pink-white flowers. Each 25c; 3 for 60c.

Sedum Kaimschaticum

-Variegated foliage with bright yellow flowers. Bushy plant. Each 25c; 3 for 60c.

Obtusalorum

—Little clumps of emerald green leaves. Red flow-ers. Each 25c; 3 for 60c.

Sieboldie

One of the most beautiful and desirable of the Sedums. Bright pink flowers, steel gray foliage. A dwarf bushy plant. Each 35c; 3 for 90c.

Sieboldie variegated

—Same as above except foliage is variegated. Each 35c; 3 for 90c.

Spectabilis brilliant.

—Same as above except flowers bright red. Each 30c; 3 for 75c.

Sedum spurrium

Strong growing Sedum with rosy-crimson flowers. Each 25c; 3 for -Strong growing 60c.

Sedum Stolonifera

-Flat succulent leaves, pink flowers. Each 25c; 3 for 60c.

Sempervivum. House Leek

These curious and interesting globular plants are esting globular plants are very useful for imbedding in rock walls and for the rock garden as well as for the border. They succeed well in any well drained soil in full sun. Prefer dry location. All Sempervivum. Each 30c; 3 for 75c.

—Globiflerum. Flattened rosettes of gray-green leaves lightly tipped with brown. Pale yellow flowers.

ers.

Tectorum. The common House Leek. Also called

Hen and Chicken

-Trieste. Upper part of leaves reddish brown, brown, flowers are bright red.

Spirea Filapendula Dropwort B—Fernlike foliage with numerous corymbs of creamy white flowers on 15 in. stems. Each 30c; 3 for 75c.

Spirea Ulmaria variegated.
—B—Beautiful variegated foliage with feather plumes of white flowers. Each 30c; 3 for 75c.

Spirea Ulmaria Fl. Pl.

Of same habit as above with dbl. white flowers.
Each 30c; 3 for 75c.

Sanguinea canadense Bloodroot
*—SM—A very showy plant for
early spring bloom. Pure
white flowers with broad
pale green leaves. Plant
dies down like Tulips after blooming, making
room for other plants
such as annuals. Each
25c: 3 for 60c. 25c; 3 for 60c.

Smilacena Racemosa

False Solomon Seal

*—S—2 ft. A native perennial herb. Resembles Solomon Seal, bearing its flowers in fluffy racemes on stem terminal. Greenish-white flowers. Best adapted to the wild garden. Each 30c; 3 for 75c.

Statice latifolia

-RBC-Sea Pink, Sea Lavender. A useful hardy plant for border and rock garden. Tufts of leathery leaves from which rise immense airy heads of tiny purple-blue flowers. Valuable for cutting and may also be dried for winter bouquets. Each 30c; 3 for 75c.

Thalictrum. Meadow

Rue Adiantifolia

*—M—A tall growing plant
with foliage resembling
Maidenhair Fern foliage
Miniature white flowers
on tall slender spikes.
Useful for background in wild garden. Each 30c; 3 for 75c.

Thalictrum Aquilegiafolia

*-Graceful foliage cut like the Columbine Rosy purple flowers, on 2 to 3 ft. stems. Each 30c; 3 for 75c.

Thalictrum Glaucum

*—Grayish blue foliage with yellow flowers. Growing to height of 18 inches. Each 30c; 3 for 75c.

Thymus. Mother of Thyme —O—Much branched rather woody prostrate herb. woody prostrate nero.
Stems wiry and rooting at the joints. Useful for carpeting dry spots in rock garden and for planting between flagstones.

Thymus serphyllum Album -Dark green foliage, white flowers.

Thymus Languinosa

---Wooly Thyme. Graygreen wooly foliage very
fragrant with bright pink flowers.
-All Thymes. Each 25c;

3 for 60c.

Tradescantoa bractata.

Spiderwort

*—RS—A hardy perennial
about 12 in. high. Narrow lance shaped leaves.
3 petaled flowers of purplish blue. Well drained
soil in open sun. Each
25c; 3 for 60c.

Trillium. Wake Robin
—Beautiful woodland plants, growing naturally in moist soil rich in humus. They are easily transplanted and is best done in August and September when the bulbs are dormant. May also be transplanted in early spring. Fine for naturalizing in colonies in woodlands. lands.

Trillium Erectrum

*—RS—Strong growing 12-15 in. Flowers white to pink or brownish purple. Each 20c; 3 for 50c.

Trillium Grandiflora

*—RS—Snow Trillium or White

Trillium. The best of the

Trillium and fine for
the wild flower garden. Require shade. Each 20c; 3 for 50c; \$7.00 per 100; \$55.00 per 1000.

Uvularia perfoliate Wood Merrybells

*—RM—An erect growing na-tive perennial having clasping, stemless leaves and graceful, drooping, yellow flowers. In rich shady woodlands. Each 25c; 3 for 60c.

Veronica Crater Lake

-BO-Named after the beautiful lake in Oregon where it had its origin. Beautiful shade of blue growing to height of 15 in. Perfectly hardy. Each 35c; 3 for 90c.

Viola Blanda

Sweet White Violet

*—SM—Low growing tufted plants. 3 for 50c; 10 for \$1.50.

Viola Cornuta. Jersey Gem.

—This belongs to the Pansy Group. A beautiful plant with rich purple flowers on long stems useful for cutting. Blooming all summer. Each 30c; 3 for 75c.

Viola cuculata

—The best known of the Blue Violets. Doing well under cultivation. Our strain has very long stems and large deep blue flowers. 3 for 50c; 10 for \$1.50.

Viola pedata. Birdfoot Violet.
—Leaves cut into lobes shaped like a bird's foot. Flowers violet or purple with bright orange eye. 3 for 50c; 10 for \$1.50.

NOTE: Prices on Evergreens are for trees called for at Nursery. If they are to be shipped by Railroad there will be an extra charge for boxing and packing, which will be charged to your account at cost.

The Evergreens we offer have all been grown in the North and are all hardy. Specimen trees are selected for symmetry and compactness. They have all been several times transplanted to assure a well developed root system, also pruned and trimmed to develop form and density. All trees are carefully dug with solid ball of earth on roots and carefully wrapped in burlap and securely tied with heavy twine to assure delivery in perfect condition dition.

BABY EVERGREENS

Many tree lovers find much pleasure and interest in planting and cultivating small Evergreen Trees. To meet this demand we offer the following seedlings and once transplanted stock, dug with bare roots, puddled in mud and packed in wet moss, guaranteed to arrive in good condition. No order accepted for less than 10 trees of one size or variety.

REMEMBER: Evergreens, shrubs, and shade trees, are subject to packing charge when shipped by freight, express or otherwise. We cannot determine what this charge will be on individual orders, but in most cases it will average about 10 percent of order. If you send this amount extra with your order we will return any excess payment to you. If the packing charges are not sent with the order we assume that you will remit upon receipt of bill for same.

Due to shortage of help we cannot promise to dig evergreens and shade trees while you wait. If you wish to call for such nursery stock we suggest that you send us your order a few days in advance, stating what day you expect to call for same and we will do our best to have them ready when you call.

We have a greenhouse and we are prepared to serve our customers who call, with cut flowers and potted plants, funeral and wedding flowers. In the spring we have geraniums and other plants for window boxes, annual flowers and vegetable plants. We also have an assortment of fruit trees and berries which are hardy in this section.
